

From butterflies and bees to hummingbirds and moths, pollinators are vital to the health of our environment and critical to our agricultural system, as they pollinate a third of the world's crops.

Pollen Nation

The Plant for Pollinators Challenge is a part of the Cincinnati Zoo & Botanical Garden's Pollen Nation program. This public engagement campaign aims to increase pollinator habitat in the Greater Cincinnati region and beyond. Launched in March 2019 with a goal of registering 500 pollinator gardens, **the campaign has now surpassed 850, on the way to 1,000 gardens.**
